

EAUNwebinar

Bring the hospital to the patient

May 22, 2024

19:00 – 20:00 CEST (18:00 – 19:00 GMT)

Learning objectives

In this webinar, participants will:

- Improve their knowledge and understanding of managing NMIBC patients in their home environment/community
- Understand how they can administer intravesical treatment safely in the patient's home
- Find out how to do novel self-reporting data collection for patients at home – and report to the hospital
- Learn about NMIBC patient education, how to support patients with side effects within their home environment, and how to adapt and utilise this within your community
- Know the importance of continuing to collaborate with the EAUN network to provide innovative care for our patients
